Multipurpose Cleaners

Cabin Cleaner/Multipurpose Cleaner

MILD, WATER-BASED CLEANER FOR MULTIPLE MATERIAL

Cabin Cleaner is a concentrated, pH neutral, water-based, multipurpose cleaner, with an odour removing and sanitising effect

Cleaning power: Mild - High (depending on concentration)

Suitable for: Fabric upholstery, carpets, rugs, leather, plastic, PVC, metal and wood

This product can be diluted:

1:10 to make a stain remover.

1:20/1:30 to make a cleaner.

1:60/1:80 for use in a heat injection-extraction machine.

Uses:

- ✓ Cleaning.
- ✓ Odour removal.
- ✓ Sanitising.
- ✓ Stain remove: water-based stains, heavy soiling.

Advantages:

- ✓ Water-based.
- ✓ Concentrated.
- ✓ pH neutral.
- ✓ Multipurpose.

Available as:

- ✓ 1 litre
- ✓ 60 wipe tub.

Vinyl/Plastic & Leather Cleaner

WATER-BASED, AEROSOL CLEANER FOR MULTIPLE MATERIALS

Mohawk Vinyl/Plastic & Leather Cleaner is a quick and easy way to clean vinyl upholstery, leather, rubber, fiberglass, upholstery, enamels and varnished surfaces. It leaves a protective film for easier re-cleaning. It is especially good for cleaning vinyl and plastic auto upholstery.

Cleaning power: High

Recommended frequency of use: As needed

Suitable for: Vinyl, plastic, rubber, enamel, ceramics, chrome, fiberglass, varnished surfaces and pigmented leather

Drying time: 4-5 minutes

Product Code: High

TIPS: This product is very easy to use: just spray the cleaner on to the surface, clean the area using a lint free cloth or soft brush, and then dry the surface thoroughly with a clean cloth. Always test this cleaner in an inconspicuous area to ensure the colour-fastness of the material.

Please note, this product should not be used on semi-aniline, aniline, nubuck, suede or any other unfinished leather. This product should not be use on items that come in direct contact with food.

Uses:

- ✓ General cleaning.
- ✓ Stain removal.

Advantages:

- ✓ Easy to use.
- ✓ Quick application.
- ✓ Provides dust free protection.

Available as:

- ✓ 454 g aerosol

Crystal & Glass Cleaner

SOLVENT-BASED, AEROSOL CLEANER FOR HARD SURFACES

Windows, mirrors, and crystal remain clean longer when cleaned with Crystal and Glass Cleaner. This cleaner dries crystal clear in seconds without leaving a dirt catching film. Also used for cleaning refrigerators, stoves, chrome and other appliances.

Uses:

- ✓ Clean glass and crystal.
- ✓ Clean refrigerators, stoves and other appliances.
- ✓ Clean chrome.

Advantages:

- ✓ Easy to use.
- ✓ Dries in seconds.
- ✓ Non-dirt catching.

Available as:

- ✓ M107-0485 384ml Aerosol

Fabric Protection

Textile Protector W

WATER-BASED PROTECTOR FOR NATURAL FIBRES

Textile Protector W is a water-based, fluorochemical protection spray for natural fibres and blends (fabric protection is not recommended for synthetics). Textile Protector W can be used to protect new fabrics or to re-protect fabrics after cleaning. In that case, it can be applied while the fabric is still damp.

Type: Water-based textile protector.

Protects against: Water, oil and alcohol based stains.

Suitable for: All water-cleanable natural fibres, including upholstery and rugs

Uses:

- ✓ To protect fabric upholstery, rugs and carpets from water, oil and alcohol based stains.

Advantages:

- ✓ Quick and easy to apply.
- ✓ Water-based.
- ✓ Low odour.
- ✓ Excellent protective properties.

Available as:

- ✓ 500 ml trigger spray
- ✓ 20 litre
- ✓ Fabric Care Kit

Fabric Guard® Fabric Treatment

WATER-BASED PROTECTOR FOR NATURAL FIBRES

Mohawk Fabric Guard® Fabric Treatment is a water-based stain protector that can be easily applied to any textile surface, and provides excellent repellency to stains. This new technology protects all water cleanable textile. This product is an ideal water and oil stain repellent. It provides excellent soil resistance on all types of upholstery fabrics and carpets made from natural fibres and their blends (fabric protection is not recommended for synthetics). Helps prevent static and fabric fading from damaging UV rays. Fabric Guard® Fabric Treatment helps prolong the life of your fabric. It does not affect the fabric upholstery look or feel or contain any odour.

Type: Water-based textile protector.

Protects against: Water, oil and alcohol based stains.

Suitable for: All water-cleanable natural fibres and blends, including upholstery and rugs.

Uses:

- ✓ To protect fabric upholstery, rugs and carpets from water, oil and alcohol based stains.
- ✓ To protect fabric upholstery, rugs and carpets from fabric fading due to UV rays.

Advantages:

- ✓ Quick and easy to apply.
- ✓ pH neutral.
- ✓ Biodegradable.
- ✓ Free from bleach, solvents and other harsh chemicals.
- ✓ Better for your health.
- ✓ Better for the environment.

Available as:

- ✓ 32 oz/946 ml trigger spray

Fabric Cleaners & Stain Removers

Textile Cleaner for All Fibres

WATER-BASED CLEANER FOR ALL WASHABLE FABRICS

A gentle, yet effective textile cleaner designed for regular cleaning of most household fabrics. The formula is low residue and easy rinse, making cleaning, simple and easy. Can be used on furniture, rugs and carpets. On average, 500 ml is sufficient to clean 10 sofa seats. Always pre-test fabric for colour fastness before use.

Cleaning power: Mild

Suitable for: All fibres except pure wool and silk

Uses:

- ✓ To clean fabric.
- ✓ Stain removal: light, water-based stains.

Advantages:

- ✓ Quick and easy to apply.
- ✓ Low residue.

Available as:

- ✓ 500 ml spray bottle
- ✓ 1 litre
- ✓ Individual wipes
- ✓ Fabric Care Kit

Upholstery/Fabric Cleaner

WATER-BASED CLEANER AND STAIN REMOVER FOR ALL WASHABLE FABRICS

This water-based fabric cleaner and stain remover from Mohawk removes even tough stains, such as grease, ink, crayon, red drinks, lipstick, cosmetics, iodine, block, sunblock, shoe polish and much more. This product can be used to remove stains on washable textiles and carpeting. Always pre-test fabric for colour fastness before use.

Cleaning power: Moderate

Suitable for: Water washable fabric upholstery, rugs and carpets

Uses:

- ✓ To remove stains on water washable textiles and carpeting.

Advantages:

- ✓ No solvents.
- ✓ No bleach.
- ✓ Low VOC.
- ✓ ECO-Safe.

Available as:

- ✓ 32 oz/946 ml trigger spray

Skai/PU Cleaner

WATER-BASED CLEANER FOR PU, VINYL AND OTHER COATED TEXTILES

Skai Cleaner is a highly effective cleaner for vinyl skai, PU, imitation leathers and other coated textiles. This gentle water-based cleaner will not only remove everyday dirt and stains but it will also eliminate mould and mildew. Always pre-test fabric for colour fastness before use.

Cleaning power: Mild

Recommended frequency of use: Every 3-6 months for domestic furniture, or as needed

Suitable for: Skai, PU, vinyl, eco-leather and imitation leather

Uses:

- ✓ General cleaning.
- ✓ Stain removal.

Advantages:

- ✓ Quick and easy to apply.
- ✓ Will remove soiling, light stains and mildew.
- ✓ Will not cause the finish to become sticky, as solvent based cleaners will.

Available as:

- ✓ 500 ml
- ✓ 60 wipe tub
- ✓ PU Care Kit

Stain Away

WATER-BASED, ALKALINE STAIN REMOVER FOR FABRIC

Stain Away is a water-based product for removing most fresh stains, even fresh ballpoint pen stains, from microfibres or protected textiles. Always pre-test fabric for colour fastness before use.

Cleaning power: Moderate

Suitable for: Fabric upholstery, carpets and rugs

Uses:

- ✓ Stain removal: most fresh stains on microfibres or protected textiles.

Advantages:

- ✓ Highly affective on acidic and oily stains.
- ✓ Will also remove water-based stains including those caused by foods, beverages, and bodily fluids.
- ✓ pH 10.5

Available as:

- ✓ 1 litre
- ✓ Individual wipes
- ✓ SOS Kit

Resistant Stain Cleaner

CONCENTRATED, WATER-BASED, MILDLY ACIDIC STAIN REMOVER FOR FABRIC

Resistant Stain Cleaner is a highly concentrated stain removal gel designed to remove old and resistant stains like marker, ballpoint pen, lipstick, make-up products, shoe polish and wax. Use Resistant Stain Cleaner in conjunction with the other products in the SOS Textile Stain Remover Kit (Stain Away, Ox'Cleaner, Stain Remover S). Always pre-test fabric for colour fastness before use.

Cleaning power: High

Suitable for: Fabric upholstery, carpets and rugs

Uses:

- ✓ Stain removal: old or resistant stains, such as marker, ballpoint pen, lipstick, make-up, shoe polish and waxes.

Advantages:

- ✓ Concentrated gel allows for focused stain removal.
- ✓ pH 6.5

Available as:

- ✓ 1 litre
- ✓ SOS Kit

Stain Remover S

WATER RINSEABLE, SOLVENT-BASED STAIN REMOVER FOR FABRIC

Stain Remover S is a non-flammable solvent based product formulated to remove grease, oil, dirty oil deposit, butter, perspiration, glue, paint, markers, ballpoint pen, lipstick, make-up, shoe polish and wax stains. Easy to apply with a simple cloth. This product can be used in conjunction with water-based products. Always pre-test fabric for colour fastness before use.

Cleaning power: High

Suitable for: Fabric upholstery, carpets and rugs

Uses:

- ✓ Stain removal: grease, oil, dirty oil deposit, butter, perspiration, glue, paint, markers, ballpoint pen, lipstick, make-up, shoe polish and wax stains.

Advantages:

- ✓ Water rinseable.
- ✓ Non-volatile solvent.
- ✓ Non-flammable
- ✓ Can be used in conjunction with water-based products.
- ✓ Safe for use with heat extraction machines.

Available as:

- ✓ 1 litre
- ✓ SOS Kit

Ox'Cleaner

OXIDISING STAIN REMOVER FOR TEXTILES

Ox'Cleaner is specifically formulated to remove food and beverage stains such as coffee, tea, wine and soft drinks on fabrics and clothing, Ox'Cleaner is equally effective at eliminating other difficult stains including blood, urine, vomit, water marks and yellowing. It can be applied directly to a stain or as a final application when a stubborn stain persists after first trying Stain Away. Always pre-test fabric for colour fastness before use.

Cleaning power: High

Suitable for: Fabric upholstery, carpets and rugs

Uses:

- ✓ Stain removal: stubborn stains.

Advantages:

- ✓ Low odour.
- ✓ Highly affective on difficult stains.
- ✓ Will also remove water marks and yellowing.

Available as:

- ✓ 1 kg
- ✓ SOS Kit

Ink Remover

SOLVENT-BASED INK REMOVER FOR VINYL AND FABRIC

Mohawk's Ink Remover is designed to remove ball point pen ink from vinyl upholstery, polyester, cotton and wool fabric. Just dab on and blot off with clean cloth when ink is dissolved. Always pre-test fabric for colour fastness before use.

Cleaning power: Very high (use with care)

Suitable for: Vinyl, polyester, cotton, wool

Uses:

- ✓ Stain removal: ball point ink from vinyl and other fabrics.

Advantages:

- ✓ Easy to use.
- ✓ Quick results.
- ✓ Will not ruin fabrics.

Available as:

- ✓ 8 cc marker

Zipkleen™ Aerosol

SOLVENT-BASED SPOT CLEANER FOR ALL FABRICS

Zipkleen™ Spot Remover Aerosol is a versatile and effective spot cleaner for upholstery, rugs, and fabrics. Removes stubborn stains such as adhesive tape, tar, oil, grease, gum, and more. Always pre-test fabric for colour fastness before use.

Cleaning power: High

Suitable for: Fabric upholstery, rugs, draperies, clothing and other fabrics

Uses:

- ✓ To remove stubborn stains from fabric.

Advantages:

- ✓ Fast acting
- ✓ Easy to use
- ✓ Very effective
- ✓ Mild odour
- ✓ Quick drying
- ✓ Does not leave rings
- ✓ Safe for most fabrics
- ✓ Evaporates quickly

Available as:

- ✓ 13 oz/384 ml aerosol

Leather Protection

Leather Protection Cream

WATER-BASED PROTECTION FROM WATER, ALCOHOL AND OIL-BASED STAINS

Shield your furniture with Leather Protection Cream. This water-based protection product works by placing an invisible, breathable barrier between you and your furniture. Leather Protection Cream helps to prevent soiling and guards your furniture from water, oil and alcohol-based stains. No product can provide 100% protection, but Leather Protection Cream prevents the majority of soiling and stains, and makes those stains that do occur easier to remove.

Protects against: Water, alcohol and oil-based stains

Reapplication: Every 3-6 months, or after cleaning with a leather cleaner

Suitable for: Pigmented, aniline and pull-up leathers

Coverage: 250 ml will treat approximately 35-45 seats/each wipe will treat approximately 2-3 seats

TIPS: Leather Protection Cream does not need to be applied thickly, a thin coat applied to the contact areas (seats, headrests, footrests, armrest etc) is all that is required. For light coloured leathers or leather that receives heavy use, we recommend applying two thin coats. Allow to dry between coats.

Uses:

- ✓ To protect leather from water, oil and alcohol-based stains.
- ✓ To protect leather from the damaging affects of sweat and body oils.

Advantages:

- ✓ Water based.
- ✓ Quick and easy to apply.
- ✓ Does not affect the look and feel of the leather.
- ✓ Long lasting protection.
- ✓ Increases the softness of the leather.
- ✓ Removes light scratches from aniline and pull-up leathers.

Available as:

- ✓ 250 ml
- ✓ 1 litre
- ✓ 5 litre
- ✓ Individual wipes
- ✓ 60 wipe tub
- ✓ Natural Leather Care Kit

Leather Barrier

WATER-BASED PROTECTION FROM DYE AND PRINT TRANSFER

Leather Barrier is designed to protect light coloured leather and vinyl from dye and print transfer. Nothing can provide 100% protection against dye transfer, but Leather Barrier will prevent the vast majority of transfer stains and make any that do occur easier to remove. Leather Barrier provides some protection against water, oil and alcohol-based stains, but for added protection we recommend applying Leather Protection Cream before applying Leather Barrier.

Protects against: Dye and print transfer

Reapplication: Every 3-6 months, or after cleaning with a leather cleaner

Suitable for: Light coloured pigmented leather, aniline leather and vinyl

Coverage: 1 litre will treat approximately 140-180 seats (coverage will vary depending on the absorbency of the leather)

TIPS: Leather Barrier does not need to be applied thickly, we recommend applying two thin coats – allow to dry between coats.

Please note: should not be used on dark coloured leather.

Uses:

- ✓ To protect light leather and vinyl from dye and print transfer.

Advantages:

- ✓ Water based.
- ✓ Quick and easy to apply.
- ✓ Does not affect the look and feel of light coloured leather or vinyl.
- ✓ Long lasting protection.

Available as:

- ✓ 1 litre
- ✓ Light Coloured Leather Care Kit

Ink Stop

WATER-BASED PROTECTION FROM DYE AND PRINT TRANSFER

Ink marks are one of the most difficult stains to remove from leather. Most leather protection products cannot protect leather from ink marks, Ink Stop can. Ink Stop not only creates a protective barrier against ink, it also helps to protect leather from general soiling and common stains, including dye transfer. If used in the recommended frequency cycles, Ink Stop will prevent up to 80% of ink marks.

Protects against: Ink stains, dye transfer, general soiling, and water oil and alcohol-based stains.

Reapplication: Every 3 months, or after cleaning with a leather cleaner.

Suitable for: Pigmented leather, oil pull-up leather and vinyl.

Coverage: 250 ml will treat approximately 25-35 seats/one wipe will treat approximately 1-2 seats.

TIPS: Because of Ink Stop's friction reducing properties, it can be applied to oil pull-up leathers to help prevent scratch marks. It will also help prevent light scratching on pigmented leather. Ink Stop provides some protection from dye transfer, however for superior protection against dye transfer we recommend Leather Barrier. Ink Stop should not be applied thickly, we recommend applying two thin coats – allow to dry between coats.

Uses:

- ✓ To protect leather and vinyl from general soiling.
- ✓ To protect leather and vinyl from water, oil and alcohol-based stains.
- ✓ To protect leather and vinyl from ink marks.
- ✓ To help prevent scratch marks on pigmented and oil pull-up leathers.

Advantages:

- ✓ Quick and easy to apply.
- ✓ Ink Stop is suitable for use on dark coloured leather.
- ✓ Improves the feel of the leather and vinyl.
- ✓ Long lasting protection against ink.
- ✓ Provides added protection from dye transfer.

Available as:

- ✓ 150 ml
- ✓ 1 Litre
- ✓ 60 wipe tub

NUBUCK CARE

Nubuck Eco Protector

WATER-BASED PROTECTION FROM WATER, ALCOHOL AND OIL-BASED STAINS

Because it is so susceptible to staining, it is very important to protect nubuck leather. Nubuck Eco Protector is a water-based protector specifically designed for nubuck and other sensitive leathers. Eco Protector provides excellent protection against oil, water and alcohol based stains. Eco Protector will also reduce general soiling. Nothing can provide 100% protection against soiling and stains, but protected leather is always easier to clean.

Protects against: Water, alcohol and oil based stains

Reapplication: Every 3-6 months, or after cleaning with the Nubuck Cloth, or Nubuck Cleaner

Suitable for: Nubuck and suede

Coverage: will vary depending on the absorbency of the leather

Uses:

- ✓ To protect nubuck and suede from water, alcohol and oil based stains.

Advantages:

- ✓ Quick and easy to apply.
- ✓ Water-based.
- ✓ Low odour.
- ✓ Does not affect the look and feel of the leather.
- ✓ Will not leave marks or spots on the leather.
- ✓ Long lasting protection.

Available as:

- ✓ 500 ml
- ✓ Nubuck Leather Eco Care Kit

Nubuck Aerosol Protector

SOLVENT-BASED PROTECTION FROM WATER, ALCOHOL AND OIL-BASED STAINS

Protects against: Water, alcohol and oil based stains

Reapplication: Every 3-6 months, or after cleaning with the Nubuck Cloth, or Nubuck Cleaner

Suitable for: Nubuck and suede

Coverage: will vary depending on the absorbency of the leather

Uses:

- ✓ To protect nubuck and suede from water, alcohol and oil based stains.

Advantages:

- ✓ Quick and easy to apply.
- ✓ Does not affect the look and feel of the leather.
- ✓ Will not leave marks or spots on the leather.
- ✓ Long lasting protection.
- ✓ Super fine spray coverage.

Available as:

- ✓ 400 ml aerosol
- ✓ Nubuck Care Kit

Nubuck Cloth

DRY CLEANING CLOTH FOR NUBUCK, SUEDE AND MICROFIBRE

The Nubuck Cloth makes cleaning nubuck a breeze. The Nubuck Cloth is a dry clean product – no liquids are necessary. So, unlike liquid cleaners, the Nubuck Cleaning Cloth can be used to spot clean nubuck. The cloth will remove surface soiling, and the flattening and matting commonly caused by body oils. It can also be used on suede and microfibre.

Cleaning power: Mild

Recommended frequency of use: Every 1-3 months for domestic furniture, as needed, for commercial furniture

Suitable for: Nubuck, suede and microfibre

Uses:

- ✓ To dry clean.
- ✓ To spot clean.
- ✓ To restore the nap to nubuck.

Advantages:

- ✓ Quick and easy to use.
- ✓ No liquids necessary.
- ✓ Will not leave water marks or alter the look of the leather, so you can remove marks and stains without the need to clean seam-to-seam.

Available as:

- ✓ Cloth & sponge
- ✓ Pack of cloths
- ✓ By the meter (width 35cm)
- ✓ Nubuck Eco Care Kit
- ✓ Nubuck Care Kit

Nubuck Cleaner

MILD, WATER-BASED, PH NEUTRAL STAIN REMOVER FOR NUBUCK

Nubuck Cleaner is a water-based cleaner for nubuck leather. Nubuck cleaner is designed to gently remove stains and heavy soiling from nubuck and other sensitive leathers. Because it is a sensitive leather, liquid cleaners should only be used on nubuck when necessary.

Recommended frequency of use: As needed

Suitable for: Nubuck and suede

TIPS: The colour of nubuck will change when any liquid is applied, even water, so whenever you clean nubuck furniture with a liquid cleaner you will need to clean from seam-to-seam to ensure the colour remains even. For regular cleaning and spot removal, we recommend the Nubuck Cloth.

To prevent over wetting the leather, make sure you apply Nubuck Cleaner as a foam, not a liquid. To create foam, apply Nubuck Cleaner to a sponge and squeeze until the product foams, or use a foaming bottle.

Uses:

- ✓ To remove heavy soiling.
- ✓ To remove water-based stains.

Advantages:

- ✓ Water-based.
- ✓ pH neutral.
- ✓ Will not leave marks or spots on the leather (if the leather is cleaned from seam to seam).
- ✓ Gentle on even the most sensitive leathers.

Available as:

- ✓ 1 litre
- ✓ Nubuck Eco Care Kit
- ✓ Nubuck Care Kit

Leather Revitalisers & Polishes

Wax On

REVITALISING AGENT FOR WAXED LEATHERS

Waxed leathers need to be revitalised occasionally to maintain their waxed finish. Wax On is designed to restore the look and feel of wax leathers, and provide added protection against stains. It is also an excellent remedy for mild scratch marks and light fading.

Reapplication: Every 3-6 months, or after cleaning with a leather cleaner

Suitable for: Wax pull-up leather

Coverage: 250 ml will treat approximately 30-40 seats (coverage will vary depending on the absorbency of the leather)

Uses:

- ✓ To restore the protective wax finish or wax pull-up leather.
- ✓ To restore look and feel wax pull-up leather.
- ✓ To remove mild scuffs and scratch marks from wax pull-up leather.

Advantages:

- ✓ Water based.
- ✓ Quick and easy to apply.
- ✓ Improves the look and feel of the leather.
- ✓ Will remove light scratches.
- ✓ Provides added protection from staining and soiling.

Available as:

- ✓ 250 ml
- ✓ 1 litre
- ✓ Wax On Kit

Oleosa

PROTECTIVE REVITALISING AGENT FOR OILED LEATHERS

Oleosa revitalises oiled leathers. Oiled leathers need to be re-oiled occasionally to maintain their unique characteristics. Oleosa is made from fat liqueurs similar to those originally used to create the leather's unique oiled look and feel. Oleosa will give the leather a soft, oily touch. Not only does it have excellent water proofing properties, it also contains protective agents that improve the leather's resistance to soiling and staining.

Protects against: Water, alcohol and oil based stains

Reapplication: Every 3-6 months, or after cleaning with a leather cleaner

Suitable for: Oil pull-up leather

Coverage: 250 ml will treat approximately 25-35 seats (coverage will vary depending on the absorbency of the leather)

Uses:

- ✓ To restore look and feel of oil pull-up leathers.
- ✓ Protection from general stains and soiling.
- ✓ To remove mild scuffs and scratch marks.

Advantages:

- ✓ Quick and easy to apply.
- ✓ Improves the look and feel of the leather.
- ✓ Evens out the colour of worn oil pull-up leather
- ✓ Long lasting protection.

Available as:

- ✓ 250 ml
- ✓ 1 litre
- ✓ Oleosa Kit

Leather Vital

FEEL AGENT FOR PIGMENTED LEATHER

Leather Vital is used to improve the feel of the leather. Leather Vital gives leather a soft, supple feel without affecting its breathability. Leather Vital can be used to improve the surface feel of old leathers. It can also be used to stop the squeaking that occurs in motion furniture when leather rubs against leather.

Please note, this product improves the surface feel or "hand" of the leather, but it is not a leather conditioning or softening product.

Suitable for: Pigmented leather

This product should not be used on bycast, vinyl or imitation leather.

Uses:

- ✓ To improve the feel of pigmented leather.
- ✓ To stop the squeaking that occurs when leather rubs against leather on motion furniture.

Advantages:

- ✓ Quick and easy to use.
- ✓ Improves the hand of the leather without affecting breathability.

Available as:

- ✓ 250 ml
- ✓ 1 litre

Shine

PATENT LEATHER CLEANER AND POLISH

Shine is a high-quality polish that will clean, protect and add shine to high gloss finishes. This water-based, semi-liquid emulsion is designed specifically for use on high gloss finishes, including patent leather, coated polyurethane and imitation leather.

Protects against: General soiling and stains, and stains and marks caused by skin contact

Reapplication: Every 3 – 6 months

Suitable for: Patent leather, high gloss pigmented leathers, and coated polyurethane and imitation leather

Drying time: 30 minutes

Uses:

- ✓ To clean high gloss finishes.
- ✓ To protect high gloss finishes.
- ✓ To polish high gloss finishes.

Advantages:

- ✓ Extremely smooth, glossy finish.
- ✓ Dries to a hard finish.
- ✓ Provides protection against stains and soiling.

Available as:

- ✓ 1 litre

Leather Cleaners

One Wipe

2-IN-1 CLEANER AND CONDITIONER FOR PIGMENTED LEATHER

Cleaning is made easy with Leather One Wipe. Ideal for a fast, all-over clean and polish, Leather One Wipe will leave your furniture clean and conditioned in no time. Suitable for pigmented finishes, it's a handy conditioning and cleaning product that comes in a convenient spray bottle.

Cleaning power: Mild

Recommended frequency of use: Every 3-6 months

Suitable for: Pigmented leather

Uses:

- ✓ To clean and condition leather

Advantages:

- ✓ Quick and easy to apply.
- ✓ Improves the look and feel of the leather.

Available as:

- ✓ 500 ml spray bottle

Leather Soft Cleaner

MILD, WATER-BASED, PH NEUTRAL CLEANER

The secret to long lasting leather is regular cleaning. Leather Soft Cleaner is the perfect leather cleaner: it is mild, water-based and pH neutral. Soft Cleaner is tough enough to remove soiling and water-based stains, but gentle enough to be used regularly on leather furniture, shoes, handbags and clothing.

Cleaning power: Mild

Recommended frequency of use: Every 3-6 months for domestic furniture and every 40 days for commercial furniture

Suitable for: Pigmented, aniline and pull-up leather

TIPS: To prevent over wetting the leather, make sure you apply Leather Soft Cleaner as a foam, not a liquid. This is particularly important when cleaning delicate aniline leathers. To create foam, apply Soft Cleaner to a sponge and squeeze until the product foams, or use a foaming bottle (recommended when cleaning aniline leather).

Uses:

- ✓ Regular cleaning.
- ✓ To remove light, water based stains.

Advantages:

- ✓ Water based.
- ✓ pH neutral.
- ✓ Gentle on leather.
- ✓ Easy to use.

Available as:

- ✓ 250 ml
- ✓ 1 litre
- ✓ Individual wipes
- ✓ Leather Care Kits

Leather Strong Cleaner

MILD, WATER-BASED, PH NEUTRAL STAIN REMOVER

Strong Cleaner is Soft Cleaner's big brother. Like Soft Cleaner, Strong Cleaner is water-based and pH neutral, however it contains twice as many active ingredients as Soft Cleaner. Leather Strong Cleaner is designed to remove heavy soiling and tough water-based stains.

Cleaning power: Moderate

Suitable for: Pigmented, aniline and pull-up leather

Recommended frequency of use: As needed

TIPS: To prevent over wetting the leather, make sure you apply Leather Strong Cleaner as a foam, not a liquid. This is particularly important when cleaning delicate aniline leathers. To create foam, apply Strong Cleaner to a sponge and squeeze until the product foams, or use a foaming bottle (recommended when cleaning aniline leather).

Uses:

- ✓ To remove heavy soiling.
- ✓ To remove water-based stains.

Advantages:

- ✓ Water based.
- ✓ pH neutral.
- ✓ Gentle on leather.
- ✓ Easy to use.

Available as:

- ✓ 250 ml
- ✓ 1 litre
- ✓ 5 litre
- ✓ Individual wipes
- ✓ 60 wipe tub

Universal Cleaner

HIGH-POWER, WATER-BASED STAIN REMOVER

Universal Cleaner is the strongest cleaner in Multimaster's consumer range. It is a high power cleaner designed to tackle heavy soiling and difficult stains, such as coffee or red wine. Stronger cleaners are tougher on dirt, but they are also tougher on leather, that's why Universal Cleaner contains a special feel agent to protect leather from drying.

Cleaning power: High

Recommended frequency of use: As needed

Suitable for: Pigmented leather

TIPS: To prevent over wetting the leather and to improve the products cleaning power, apply Universal Cleaner as a foam, not a liquid. To create foam, apply the cleaner to a sponge and squeeze until the product foams, or use a foaming bottle (recommended when purchasing the 1 and 5 litre sizes, the 200ml size comes in a foaming bottle).

Uses:

- ✓ To remove heavy soiling.
- ✓ To remove difficult stains.

Advantages:

- ✓ Water-based.
- ✓ Will not damage the leather or finish.
- ✓ Contains a feel agent to maintain the leather's soft feel.
- ✓ High power cleaner.
- ✓ Easy to use.
- ✓ Universal Cleaner foam, created using a foaming bottle or sponge, can be used to remove stains from delicate leathers, such as aniline and pull-up leather.

Available as:

- ✓ 200 ml (foaming bottle)
- ✓ 1 litre
- ✓ 5 litre
- ✓ Individual wipes
- ✓ 60 wipe tub

Rapid S

WATER-BASED, ALKALINE STAIN REMOVER

Rapid S is a highly concentrated, alkaline cleaner designed to remove tough stains, such as greasy marks and heavy soiling. We recommend using Rapid S to preparing leather for repairs or recolouring. Rapid S will remove all traces of grease and oil without leaving any residue that may affect the quality of the repair.

Cleaning power: Very high (recommended for professional use only)

Recommended frequency: As needed. Please note: Rapid S should not be used more than two times in succession on the same area (the area will need at least 24 hours to fully stabilise before it is safe to reapply Rapid S)

Suitable for: Pigmented leather

Drying time: 5–10 minutes

TIPS: Care should be taken when using Rapid S, it is an aggressive cleaner, it can cause damage to the leather topcoat if used incorrectly.

Please note, because Rapid S is alkaline, you will need to neutralise the leather after cleaning. To do this simply clean the area with Leather Soft, Leather Strong Cleaner or distilled water.

Uses:

- ✓ To remove difficult stains.
- ✓ To prepare leather for repairs and colour application.
- ✓ To restore the matt look of car leather upholstery.
- ✓ To remove shiny residue caused by over application of spew remover.

Advantages:

- ✓ Water-based.
- ✓ Highly concentrated, high power cleaner.
- ✓ Improves adhesion of repair and colour products.

Use with:

- ✓ Leather Soft Cleaner or Leather Strong Cleaner

Available as:

- ✓ 200 ml
- ✓ 1 litre
- ✓ 5 litre

Super Cleaner

ALCOHOL-BASED STAIN REMOVER

Super Cleaner is the strongest cleaner in the Multimaster range. It will remove dye transfer, newspaper print and deep stains when nothing else will. It will also remove old ink stains.

Cleaning power: Very high (recommended for professional use only)

Suitable for: Pigmented leather

TIPS: Super Cleaner is an alcohol-based product – it must be used with caution. Always apply enough product to the cloth to allow the product to draw the stain out without rubbing. Do not create friction. Friction may damage the topcoat and remove colour. You can water this product down with distilled water to make it less aggressive.

In most cases, you will need to recolour and refinish the affected area after cleaning. If you are unable to remove all traces of the mark, you can use Pre-Bottom C prior to applying touch up colour to help prevent any remaining ink, tannins or dyes from bleeding through.

Please note, because Super Cleaner is alcohol-based, you will need to neutralise the leather after cleaning. To do this simply clean the area with Leather Soft, Leather Strong Cleaner or distilled water.

Uses:

- ✓ To remove deep, tannin stains, like red wine, coffee, or mustard.
- ✓ To remove dye and print transfer.
- ✓ To remove old ink stains.

Advantages:

- ✓ High power cleaner.
- ✓ Alcohol-base allows the cleaner to remove stains that water-based products will not remove.

Use with:

- ✓ Soft or Strong Cleaner
- ✓ A suitable protection product
- ✓ Sherlock Colour System

Available as:

- ✓ 225 ml
- ✓ 1 litre

Colour Transfer Remover

TARGETED REMOVER FOR DYE AND PRINT TRANSFER

Colour Transfer Remover removes tough pigment and dye-based stains such as dye transfer, ink, and print transfer. Colour Transfer Remover uses the latest advancements in cleaning technology to gently draw stains to the surface of the leather, where they can be easily removed. This ensures that Colour Transfer Remover is highly effective on stains, while being relatively gentle on leather.

Dwell time: In most cases dye transfer will wipe straight off with Colour Transfer Remover, but the dwell time required will vary from seconds to overnight depending on how far the stain has penetrated into the leather. **Do not allow the product to dry on the leather.**

Cleaning power: Very high (use with care)

Suitable for: Pigmented and aniline leather

TIPS: Colour Transfer Remover can also be used to remove stains caused by ballpoint ink, markers, shoe polish, lip stick and textas. For such a high power cleaner, Colour Transfer Remover is relatively gentle on the leather, but remember not rub or scrub the leather – this will cause damage. After removing the stain with Colour Transfer Remover you will need to remove any residue using Soft Cleaner or Strong Cleaner.

Please note, this product should not be used on dark coloured leather.

Uses:

- ✓ To remove dye transfer.
- ✓ To remove print transfer.
- ✓ To remove ink marks.

Advantages:

- ✓ Does not damage the leather or finish if used as directed.
- ✓ Removes dye and print transfer quickly and safely.
- ✓ High viscosity allows for greater working and dwell time.

Use with:

- ✓ Leather Soft Cleaner or Leather Strong Cleaner
- ✓ Leather Barrier

Available as:

- ✓ 147 ml (Dye Transfer Cleaner)
- ✓ 1 litre
- ✓ Light Coloured Leather Care Kit

Leather Degreaser

TARGETED GREASE & OIL REMOVER

Once oil or grease has penetrated the grain of the leather it can be difficult to remove. Leather Degreaser draws grease and oil stains out of leather, trapping them on the surface where they can be easily removed.

Cleaning power: High

Dwell time: Varies from minutes to over night depending on the amount of grease/oil present .

Suitable for: Pigmented leather, aniline leather, nubuck and suede

TIPS: Grease and oil stains can take time to remove. Be patient! Allow the product to dry naturally. Do not force dry. When the product is completely dry it will form a white or yellowish powder on top of the leather that can be brushed or vacuumed off. If the area is heavily stained, several applications may be needed to completely remove all traces of the stain.

Uses:

- ✓ To remove greasy or oily stains.
- ✓ To remove stains caused by hair and body oils.

Advantages:

- ✓ Removes ingrained greasy and oil marks that other cleaners can not remove.
- ✓ Suitable for use on even the most sensitive leathers.

Use with:

- ✓ Soft Cleaner, Strong Cleaner or Nubuck Cloth
- ✓ A suitable protection product

Available as:

- ✓ 75 ml aerosol
- ✓ 200 ml aerosol
- ✓ 500 ml paste
- ✓ Nubuck Care Kit

Spew Remover

SPECIALTY SPEW REMOVAL PRODUCT

Spew Remover is a specialty product for removing fat spew from leather. Fat spew occurs when the natural fats in the leather migrate, or “spew”, from the core of the leather to its surface. Fat spew can be wiped away with a cloth, but it will re-appear. To remove it permanently you need to stabilise the fats and force them back into the core of the leather. This is what Spew Remover does.

Dwell time: Allow to dwell overnight before cleaning or protecting the leather.

Suitable for: Pigmented leather, aniline leather, nubuck and suede

TIPS: Fat spew appears as a milky film or small white dots. It is often mistaken for mould. You can differentiate between fat spew and mould by performing a simple test. Fat melts when heated, so does fat spew. Use a hair dryer to heat the leather, the milky film will disappear as the fat spew melts and is reabsorbed by the leather. If the discolouration is caused by mould heat will have no effect.

You only need to apply a small amount of Spew Remover, if you apply too much an oily film may remain on the leather. If you do over apply Spew Remover, use Rapid S to remove the oily film.

Uses:

- ✓ To remove fat spew.

Advantages:

- ✓ Quick and easy to apply.
- ✓ Long lasting effect.

Use with:

- ✓ Leather Soft Cleaner or Leather Strong Cleaner
- ✓ A suitable protection product

Available as:

- ✓ 50 ml
- ✓ 250 ml

Leather Odour Remover

WATER-BASED ODOUR REMOVER

Leather Odour Remover removes unpleasant odours from leather. It is not a perfume, it doesn't work by masking odours, its powerful enzyme based formula neutralises the odours at their source. Best results are achieved 24-48 hours after application

Suitable for: Pigmented leather, aniline leather, nubuck, suede and fabric

TIPS: If the odour is not completely removed within 48 hours, reapply the product. Particularly strong odours may require several applications.

Uses:

- ✓ To remove odours from leather and fabric.

Advantages:

- ✓ Quick and easy to apply.
- ✓ Neutralises odours at their source.
- ✓ Long lasting effect.
- ✓ Suitable for use on all leather types.

Available as:

- ✓ 200 ml (spray bottle)
- ✓ 1 litre

Mould Killer

WATER-BASED ANTI-FUNGAL AGENT

Mould Killer removes mould and mildew from leather and makes sure it doesn't come back. Mould Killer contains a wetting agent that allows the product to penetrate deep into the leather to remove all traces of mould. It even removes the musty odour. Mould Killer is tough on mould, but it is gentle enough on leather to be used safely on upholstery, shoes and handbags. Allow to dwell for a minimum of one hour before cleaning or protecting the leather. Leave overnight for best results

Suitable for: Pigmented leather, aniline leather, and fabric

Uses:

- ✓ To remove mould and mildew from leather and fabric.

Advantages:

- ✓ Quick and easy to apply.
- ✓ Long lasting anti-fungal effect.
- ✓ Contains a wetting agent for maximum penetration.
- ✓ Removes the musty odour.
- ✓ Gentle on leather.

Available as:

- ✓ 50 ml
- ✓ 250 ml

Ink Away

TARGETED REMOVER FOR FRESH INK MARKS

Ink marks are one of the most difficult stains to remove. Without the right product, they are impossible to remove without damaging the leather. Ink Away is designed to dissolve fresh ink marks, without damaging the leather. Ink Away works effectively on fresh ink marks (up to five days old), you can also use it to remove lipstick stains.

Cleaning power: Very high (use with care)

Suitable for: Pigmented leather

Uses:

- ✓ To remove fresh ink marks (up to 5 days old).
- ✓ To remove lip stick marks

Advantages:

- ✓ Quick and easy to apply.
- ✓ Specifically designed to remove ink.
- ✓ If used as instructed, Ink Away will not damage the leather or finish.

Use with:

- ✓ Leather Soft Cleaner or Leather Strong Cleaner
- ✓ Ink Stop

Available as:

- ✓ 8 g stick
- ✓ 25 ml stick

Ink Killer Gel

TARGETED REMOVER FOR OLD INK MARKS

A special blend of solvents allows Ink Killer Gel to work effectively on old, cured ink stains that other cleaners can not remove. Because Ink Killer Gel is slow-drying, you can have plenty of working time.

Cleaning power: Very high (recommended for professional use only)

Drying time: 10–20 minutes

Dwell time: This product should not be left to dwell

Suitable for: Pigmented leather, PU and vinyl

TIPS: This product is very easy to use, but remember to be gentle. Dampen a cotton bud with Ink Killer Gel. Rub the stain lightly, rotating the cotton bud slow to remove the stain. Repeat until you have removed as much ink as possible. To completely remove all traces of the mark it may be necessary to apply touch up colour. Using Pre-Bottom C prior to applying touch up colour will help prevent any remaining ink from bleeding through.

Please note, this is a very strong product, it must be used with caution. You will need to remove residue with Strong Cleaner. In most cases, you will also need to recolour the affected area after cleaning.

Uses:

- ✓ To remove old ink stains.
- ✓ Can also be used to remove or lighten other stubborn stains such as permanent marker.

Advantages:

- ✓ Works effectively on old ink stains that other cleaners can not remove.
- ✓ Gel form allows for targeted application and longer working time.

Use with:

- ✓ Leather Soft Cleaner or Leather Strong Cleaner
- ✓ Leather Protection Cream
- ✓ Ink Stop
- ✓ Pre-Bottom C
- ✓ Sherlock Colour System

Available as:

- ✓ 50 ml

SHERLOCK

Professional Color System

The technological advancements featured in the Sherlock Professional Colour System allow for increased efficiency and dramatic time saving for the repair of leather and synthetics, translating to huge cost savings. All Sherlock Professional Colour System components work together seamlessly, no need to worry about product incompatibility. Sherlock is the only all-in-one professional colour system for furniture, automotive and aviation leather and synthetic upholstery.

System Components

SHERLOCK COLOURS

Complete range of water based colours for repair coating.

THINNER

Diluting agent for SHERLOCK colours.

THICKENER

Thickener for SHERLOCK colours – turns any Sherlock colour into a leather filler.

PRE-BOTTOM W

Water based Pre-bottom with high sealing effect.

CLEANER

Water-based cleaner.

TOP GLOSS

Water based gloss topcoat.

TOP MATT

Water based matt topcoat.

HARDENER TA

Water soluble cross-linker.

SHERLOCK READER

Colour sensor for colour matching through our SHERLOCK database.

SCALE

Scale for exact dosing of chemicals.

Using the System

1. CLEAN

Wipe with CLEANER and remove with a clean cloth. Treatment can be repeated if necessary.

2. PRE-BOTTOM

In cases of deep damage or highly absorbent surfaces, apply PRE-BOTTOM W with a cloth to avoid hardening of the leather and to improve adhesion.

3. COAT

Read the colour with SHERLOCK SENSOR and look for similar colours through our online database. Mix SHERLOCK colours as suggested and fine tune the formula to match the exact colour. Apply the colour mix with cloth, then add 5-10% of THINNER and spray several coats until the coverage is uniform. Always dry between coats. The colour can also be used as a filler when thickened with 2-5% of THICKENER; in this case apply the colour mix with a spatula.

4. TOPCOAT

Use TOP GLOSS, TOP MATT or a mix of both to match the required sheen. For optimum adhesion, add 2-5% of HARDENER TA to the topcoat and spray two layers on to the repaired area.

Sherlock Colours

Water-based colours for pigmented leather and synthetics

Featuring superior adhesion, outstanding rub resistance, and a fast drying formula, Sherlock Colours allow you to create durable, natural feeling repairs quickly and easily on both leather and synthetics. Sherlock Colours can be used as stand alone products, but for superior repairs we recommend using them in conjunction with the Sherlock Auxiliary products.

Suitable for: Pigmented leather and synthetics (vinyl, PU and other imitation leathers)

Application: Hand or spray

Skill require: Experience recommended

Advantages:

- ✓ Superior adhesion and resistance on leather and synthetics
- ✓ Fast touch-ups or a complete recolour
- ✓ Highly concentrated pigments
- ✓ Water based colours
- ✓ Outstanding wet rub resistance and flex performance
- ✓ Excellent levelling

Available sizes:

- ✓ 150 gm
- ✓ 500 gm
- ✓ 1 kg
- ✓ 5 kg

Available colours:

- ✓ Black
- ✓ Blue
- ✓ Bordeaux
- ✓ Brown
- ✓ Caramel
- ✓ Dark Brown
- ✓ Gold Yellow
- ✓ Green
- ✓ Orange
- ✓ Red
- ✓ Red Violet
- ✓ Violet
- ✓ White
- ✓ Yellow

Custom Colours

Don't have a Sherlock reader? Not a problem. We can provide you with a custom colour formula, or mix a custom colour for you. You will just need to provide us with a sample of leather or synthetic you would like us to colour match. To get an accurate reading, we require a sample no smaller than a credit card.

Available sizes:

- ✓ 50 gm
- ✓ 250 gm
- ✓ 1 kg

Sherlock Auxiliaries

THINNER 236 ml

Diluting agent for SHERLOCK colours – allows for easier spray application without compromising adhesion.

THICKENER 236 ml

Thickener for SHERLOCK colours – turns any SHERLOCK colour into a leather filler.

PRE-BOTTOM W 236 ml

Water based Pre-bottom with high sealing effect. Designed specifically for use with SHERLOCK colours.

CLEANER 300 ml

Water-based cleaner

TOP GLOSS 500 ml

Water-based gloss topcoat

TOP MATT 500 ml

Water-based matt topcoat

HARDENER TA 60 ml

Water soluble cross-linker – improves the durability and adhesion of SHERLOCK topcoats.

Sherlock Reader

Hand-held colour reader for leather and synthetics

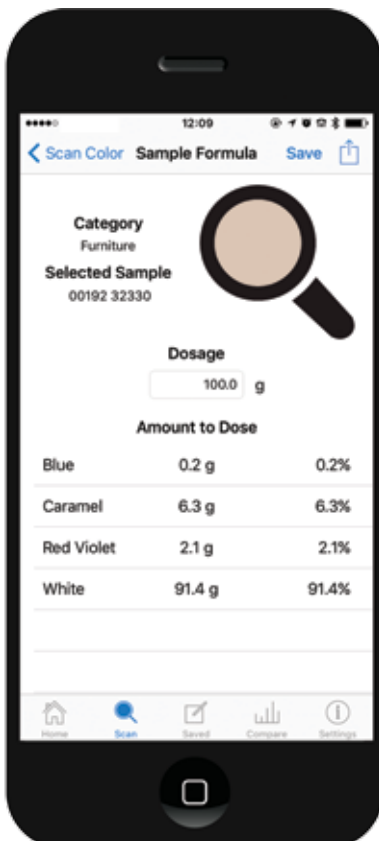

The Reader

Take the guess work out of colour matching with the Sherlock Reader. The heart of Sherlock's colour-matching system is the pocket-sized colour reader. Compared to previous generations of colour readers, the Sherlock Reader is smaller, simple to use and affordable.

Advantages:

- ✓ Instant formula results with colour mixture dosage
- ✓ Online Formula Database with daily updates
- ✓ iPhone and Android apps
- ✓ Small, fits in a toolbox or in your pocket
- ✓ No calibration needed
- ✓ Rugged shell for demanding work environments
- ✓ Up to 300 scans or six months standby time

The App

- ✓ Professional colour formulation on the go
- ✓ Quick and user friendly app
- ✓ Instant formula results
- ✓ Colour Confidence match
- ✓ Colours quantity calculation
- ✓ Available in many languages
- ✓ 1400 Formulas already available
- ✓ New formulas added daily in Italian and USA colour lab
- ✓ Share formulas via email
- ✓ Customer specific palette
- ✓ Photos and library
- ✓ Compare and QC function

The Sherlock Master Kit

Kit Contents

14 SHERLOCK COLOURS

500gm: Black, White, Caramel & Brown

150gm: Blue, Bordeaux, Dark Brown, Gold Yellow, Green, Orange, Red, Red Violet, Violet & Yellow

INSTRUCTION LEAFLET

Leather Repair

Soft Remover

SOLVENT-BASED REMOVER/DRY-CLEANING FLUID

Soft Remover is a solvent-based product that can be used as a dry-cleaning fluid or a remover. Removers are used to prepare leather for repair. When used on pigmented leather, Soft Remover will weaken the finish so that colours or finishes can penetrate and adhere to the leather. Mild removers like Soft Remover can also be used – with care – to remove heavy soiling and difficult stains from pigmented, aniline and nubuck leathers.

Type: Solvent based remover

Suitable for: Suitable for pigmented leather, aniline leather and nubuck

Skill require: Experience required

TIPS: Soft Remover will usually cause the finish of pigmented leather to turn milky or cloudy once dry. Applying pigment colour is the only way to resolve this.

Leather removers can also be used as a last resort stain removal option for aniline leather and nubuck – keep in mind that you may need to recolour the affected area depending on the colour fastness of the leather. Soft Remover is excellent for removing stubborn stains and soiling from light-coloured aniline leathers. It can also be used to remove residue from adhesive tape.

Soft Remover should not be used on leather that has suffered severe damage caused by sunlight. Always pre-test before use. Please read the safety data on the label carefully before using this product.

Uses:

- ✓ To prepare pigmented leather for repairs.
- ✓ As a last resort stain remover.

Advantages:

- ✓ Versatile, multi-use product.
- ✓ Fast acting.
- ✓ Will not dry or harden leather.

Use with:

- ✓ A suitable leather colour
- ✓ A suitable pre-bottom
- ✓ A suitable finish

Available as:

- ✓ 225 ml
- ✓ 1 litre

Strong Remover

SOLVENT-BASED STRIPPER

Strong Remover is a solvent-based stripper. It is the strongest remover in the Multimaster range. Strong Remover will remove the finish and the underlying colour. But, unlike many other solvent based strippers, Leather Strong Remover does not dry out or harden the leather. This product is best suited to major repair or restoration work, for example peeling or deeply cracked pigmented leather.

Suitable for: Suitable for pigmented and aniline leather

Skill require: Experience required

TIPS: Strong Remover can also be used on aniline leather that requires deep cleaning and preparation before an application of new colour. Please read the safety data on the label carefully before using this product.

Uses:

- ✓ To strip the finish and colour from pigmented leather in preparation for recolouring and repair.
- ✓ To clean and prepare aniline leather for recolouring.

Advantages:

- ✓ Fast acting.
- ✓ Will not dry or harden leather.

Use with:

- ✓ A suitable leather colour
- ✓ A suitable pre-bottom
- ✓ A suitable finish

Available as:

- ✓ 225 ml
- ✓ 1 litre

Leather Smart Glue

WATER-BASED, POLYURETHANE LEATHER GLUE

Leather Smart Glue is a water-based, polyurethane glue. It remains flexible once it has dried, which makes it perfect for repairing surface cuts and abrasions. Soft Glue can also be used to secure pads and patches when mending larger cuts or filling holes.

Suitable for: Suitable for pigmented leather, bonded leather and bycast

Skill require: Experience required

Physical state: Paste

Curing time: If the glued area is subject to pressure or repetitive movements allow to cure for at least 8 hours before use. Colours and finishes can be applied immediately, you do not have to wait for the glue to cure. Force drying is not recommended.

TIPS: When using Leather Smart Glue, the strength of the repair is improved if pressure is applied during the curing process. A little Soft Glue goes a long way - use it sparingly.

Uses:

- ✓ To repair cuts, rips, tears etc.

Advantages:

- ✓ Does not modify the leather's characteristics.
- ✓ Flexible.
- ✓ Excellent adhesion.
- ✓ Easy application and clean up, fine nozzle allows for accurate application.
- ✓ Excess glue is easily rubbed away from the surface of the leather.
- ✓ Low odour.

Available as:

- ✓ 8 ml

Leather & Vinyl Fil-Stiks

FLEXIBLE, SEMI-HARD WAX PUTTY

Mohawk's Leather & Vinyl Fil-Stiks are flexible wax putties that can be used to repair nicks and scratches on soft leather and vinyl upholstery.

Colourant: Pigment

Durability: Low

Adhesion: Low

Dry time: Handle or topcoat immediately after application

Skill required: No experience required

Solids WT%: 100

Suitable for: Pigmented leather

Advantages:

- ✓ Fast and easy to use.
- ✓ High opacity colour.
- ✓ Topcoats/finishes applied over the Fil-Stik will adhere without peeling or flaking.
- ✓ Range of colours to suit most common leather and vinyl finishes.

Assortment contents:

- ✓ M850-20800 Red
- ✓ M850-20801 Bone
- ✓ M850-20802 Taupe
- ✓ M850-20803 Cordovan
- ✓ M850-20804 Dark Brown
- ✓ M850-20805 Red Brown
- ✓ M850-20806 Almond
- ✓ M850-20807 Dark Taupe

✓ M850-20808 Wine

✓ M850-20809 Navy

✓ M850-20810 Black

✓ M850-20811 Maize

✓ M850-20812 Light Green

✓ M850-20813 Hunter Green

✓ M850-20814 Dark Grey

✓ M850-20815 Antique Ivory

✓ M850-20816 Rust

✓ M850-20817 Beige

✓ M850-20818 Light Almond

✓ M850-20819 Dark Blue

✓ M850-20820 Green

✓ M850-20821 Brown Spice

✓ M850-20822 Yellow

✓ M850-20823 White

Uses:

- ✓ For filling and recolouring minor scuffs and scratches on non wear areas of leather and vinyl upholstered furniture.

Use with:

- ✓ For added durability we recommend applying a finish

Available as:

- ✓ M850-20824 24 Pack Assortment

Leather Filler 1

WATER-BASED, ACRYLIC FILLER

Leather Filler is a water-based, acrylic paste for repair and restoration work. It can be used to fill scratches, cracking, wrinkling and mended cuts.

Suitable for: Suitable for pigmented leather

Skill require: Experience required

Curing time: 2 hours

TIPS: The adhesiveness of a filler depends on its thickness - the thinner the product the better its adhesion. To provide the perfect balance between fill and adhesion, leather filler contains approximately 30% water. However, this also means that the product will shrink by up to 30% as it dries – deep scratches may need several applications of filler.

Leather Filler will lighten Sherlock Colours slightly. A few additional coats of colour may need to be applied over the repair to get the right colour match. To make recolouring the area easier, use the Sherlock Colour Thickener mixed with Sherlock Colour in place of Leather Filler.

Drying with hot air is not recommended– forced drying may decrease the adhesion of the filler.

Uses:

- ✓ To fill scratches, cracking, wrinkling and mended cuts on high wear areas.

Advantages:

- ✓ High adhesion.
- ✓ High durability.
- ✓ Creates a flexible repair.
- ✓ The feel of the final repair will be very similar to the original leather.

Use with:

- ✓ Rapid S
- ✓ Spatula
- ✓ Sherlock Colour System
- ✓ A suitable finish

Available as:

- ✓ 60 ml

Leather Filler 3 (Stucco)

HIGHLY CONCENTRATED, WATER-BASED, ACRYLIC FILLER

Stucco is a highly concentrated, water-based, acrylic paste for repair and restoration work. It is similar to Leather Filler 1, but it is thicker so it can be used to fill deeper scratches, cracking, wrinkling and cuts. The lower water content also means that Leather Filler 3 does not shrink as much as Leather Filler 1 when dry, so fewer applications are needed to fill a repair.

Suitable for: Suitable for pigmented leather and aniline

Skill require: Experience required

Curing time: Varies with depth. For shallow abrasions Leather Filler 3 can be force dried using a hair drier. Forced drying is not recommended for deeper repairs, in this case curing time is approximately 2 hours.

TIPS: Leather Filler 3 should be applied using a spatula and using light pressure to work the product into the damaged area. Spray Grain or a grain mould can be used to recreate the grain pattern on the repaired area. To do this, place the mould onto the Leather Filler 3 before the filler has completely dried and apply light pressure for approximately two seconds. For very small areas you can use your thumbprint to reproduce the grain.

Leather Filler 3 will lighten Sherlock Colours slightly. A few additional coats of colour may need to be applied over the repair to get the right colour match. To make recolouring the area easier, use the Sherlock Colour Thickener mixed with Sherlock Colour in place of Leather Filler 3.

Drying with hot air is not recommended– forced drying decreases the adhesion of the filler.

Uses:

- ✓ To fill deep scratches, cracking, wrinkling and mended cuts on low wear areas.

Advantages:

- ✓ Minimal shrinkage.
- ✓ Good durability.
- ✓ Good adhesion.

Use with:

- ✓ Rapid S
- ✓ Spatula
- ✓ Sherlock Colour System
- ✓ Spray Grain, Graining Paper, or Grain Mould Compound
- ✓ A suitable finish

Available as:

- ✓ 60 gm
- ✓ 1 kg

Quick Filler

WATER-BASED, VINYL, HEAT-CURED FILLER

Quick Filler is a water-based vinyl filler for repair and restoration work. Quick Filler cures quickly with the application of heat, so you can repair small holes and scratches in a few minutes. Quick Filler requires a heat source capable of reaching temperatures up to 150°C to cure. Unlike Leather Filler 1 & 3, Quick Filler can be used to fill voids in leather such as holes, burns, and cuts that have penetrated all the way through. Quick Filler is a vinyl filler, so it has excellent adhesive qualities and maintains its flexibility when cured. Consequently, the repair is less prone to separate or pop out.

Suitable for: Suitable for pigmented leather and aniline

Curing time: Approximately 1 minute with the application of heat

Skill require: Experience required

TIPS: You can recreate the leather grain on the repaired area using Graining Paper, or a grain mould. To recreate the grain using a grain mould, you will need to apply the mould to the repair, cover it with a piece of paper and heat the area using a heat iron for approximately one minute. Leather colour can be applied over Quick Filler.

It is helpful to heat the repair with a hair dryer before applying the colour – this helps the colour stick to the Quick Filler. It will generally take 5-8 applications to build up the colour. Dry between coats.

Because Quick Filler is vinyl based, the repair will have a glossy appearance. Soft Finish Matte can be used to dull down the shine.

Uses:

- ✓ To fill voids in the leather, such as holes, burns and wide cuts.

Advantages:

- ✓ Excellent adhesion.
- ✓ High durability.
- ✓ Fast curing.
- ✓ No shrinkage.

Use with:

- ✓ Rapid S
- ✓ Heat iron
- ✓ Sherlock Colour System
- ✓ A suitable graining product
- ✓ A suitable finish

Available as:

- ✓ 8 ml

Leather & Vinyl Repair Heat Cure Compound

WATER-BASED, VINYL, HEAT-CURED FILLER

When heat cured, Leather & Vinyl Repair Compound produces a permanent flexible bond with the surrounding leather or vinyl. Leather & Vinyl Repair Compound is colourless and can be covered with pigmented leather colours, allowing you to produce the perfect repair on any colour leather or vinyl. Grain patterns can be reproduced in the final coat of the repair using either Grain Paper or a grain mould.

Physical state: Semi-paste

Drying time: Cures in approximately 15–30 seconds with the application of high heat

Durability: High

Adhesion: High

Ease of use: Experience required / specialty tools required

Solids Vol%: 99.94

Suitable for: Pigmented leather and vinyl

Product code: M872-6804

Uses:

- ✓ To repair cuts or holes in pigmented leathers or vinyl.

Advantages:

- ✓ Works on leather and vinyl
- ✓ Provides for a professional repair
- ✓ Will flex without cracking or pulling away.
- ✓ No drying time required.
- ✓ No shrinkage.

Use with:

- ✓ Rapid S
- ✓ Heat iron
- ✓ Sherlock Colour System
- ✓ A suitable graining product
- ✓ A suitable finish

Available as:

- ✓ 227 g

Leather Spray Grain

LEATHER GRAIN SIMULATOR

Spray Grain restores the grain pattern that is often lost during the repair process. It is a clear, high-viscosity liquid that is applied in large droplets to simulate the texture of leather or vinyl. It is quick drying and may be dried with a hair drier for even faster repairs. Spray Grain is usually applied with a Mouth Atomiser but may be applied with an airbrush that is adjusted to spatter rather than spray a smooth coat. Sometimes this texture blends in well as-is, but sometimes a light sanding to flatten the peaks is necessary to create a better texture match. Once dry, colour and finish can be applied to complete the repair.

Physical state: Liquid

Dry time: 15–20 minutes. This product can be force dried with a hair drier, in which case it dries in minutes.

Suitable for: Pigmented leather and vinyl

Product code: M870-9400

Uses:

- ✓ To restore grain patterns over leather and vinyl repairs.

Advantages:

- ✓ Fast drying.
- ✓ Can be force dried.
- ✓ Quick, easy application.
- ✓ Compatible with any leather colour system.
- ✓ Good adhesion, for long lasting repair.
- ✓ Water-based.

Use with:

- ✓ Mouth Atomiser
- ✓ Leather Filler 1, Leather Filler 3, Mender, Quick Filler, or Leather & Vinyl Heat Cure Compound
- ✓ Sherlock Colour System
- ✓ A suitable finish

Available as:

- ✓ 113g

Mouth Atomiser

TOOL FOR SPRAY APPLICATION

The Atomiser is a very inexpensive and easy to use tool for spray-applying Leather Spray Grain or small amounts of leather colour. It has 2 tubes positioned at 90 degree angle. One tube is the mouthpiece while the other is the dip tube. The user blows through the mouthpiece causing liquid to be pulled through the dip tube and atomized into a sprayed mist. It is fast and convenient to use because it doesn't have to be hooked to a compressor or an aerosol power pack. Some technicians also use the Atomiser to apply pigment and topcoat over repairs.

Product code: M870-9350

Uses:

- ✓ To apply Leather Spray Grain.

Advantages:

- ✓ No compressor or aerosol pack needed.
- ✓ Easy set up and clean up.
- ✓ Inexpensive.

Use with:

- ✓ Leather Spray Grain

Grain Mould Compound & Catalyst

LEATHER GRAIN MOULD MAKER

Grain Mould Compound is a flexible semi-paste that is used to create a mould for reproducing grain pattern on vinyl or leather repairs where a filler has been used. Grain Mould Compound requires a catalyst for curing.

Physical state: Semi-paste

Cure time: 30 minutes, should not be force dried

Suitable for: Pigmented leather and vinyl

Uses:

- ✓ To create grain moulds for repairs on pigmented leather or vinyl where a filler has been used.

Advantages:

- ✓ Creates a custom grain match.
- ✓ Long lasting, re-useable grain mould.
- ✓ Flexible at low temperatures.

Use with:

- ✓ Leather Filler 1, Leather Filler 3, Quick Filler, or Leather & Vinyl Heat Cure Compound
- ✓ Sherlock Colour System
- ✓ A suitable finish

Available as:

- ✓ M870-6503 Grain Mould Compound (113g)
- ✓ M870-6001 Catalyst (14g)

Grain Paper

LEATHER GRAINING PAPER

Available in six popular grain patterns. Designed to duplicate grain patterns over repairs.

Product code: M870-5170 (mixed pack of 6)

Uses:

- ✓ To create grain patterns for repairs on pigmented leather or vinyl where a filler has been used.

Advantages:

- ✓ Instant.
- ✓ Available in six patterns designed to duplicate popular grains.

Use with:

- ✓ Leather Filler 1 or Leather Filler 3
- ✓ Sherlock Colour System
- ✓ A suitable finish

Available as:

- ✓ M870-5170 (mixed pack of 6)

Hardener TA

WATER-BASED CATALYST/CROSS-LINKER

Hardener TA is a water-based catalyst that acts as an accelerator and cross-linker – it decreases curing time and creates a more durable finish. It can be mixed with water-based pre-bottoms, colours, or finishes, including Pre-Bottom A, Sherlock Colour System and Finish W 1000.

Suitable for: Suitable for pigmented leather

Skill require: Experience required

TIPS: Hardener TA should make-up 2 – 3% of the total volume of the mix. Adding too much hardener will make products brittle and unworkable. It is particularly important to ensure the correct ratios are used on dark colour leather as too much hardener will make finishes opaque. The mix will remain workable for approximately 6 hours.

Uses:

- ✓ To increase the durability of finishes.
- ✓ To accelerate curing of water-based pre-bottoms, colours and finishes.

Advantages:

- ✓ Decreases curing time.
- ✓ Creates a more durable finish.

Use with:

- ✓ Pre-Bottom C
- ✓ Pre-Bottom A
- ✓ Sherlock Colour System
- ✓ Finish W 100

Available as:

- ✓ 60 ml

Hardener SLR

SOLVENT-BASED CATALYST/CROSS-LINKER

Hardener SLR is a solvent-based catalyst that acts as an accelerator and cross-linker – it decreases curing time and creates a more durable finish. It is recommended for use with Top 3 Finish.

Suitable for: Suitable for pigmented leather

Skill require: Experience required

TIPS: Hardener SLR should make-up 2–3% of the total volume of the mix. Adding too much hardener will make products brittle and unworkable. It is particularly important to ensure the correct ratios are used on dark colour leather as too much hardener will make finishes opaque. The mix will remain workable for approximately 6 hours.

Uses:

- ✓ To increase the durability of finishes.
- ✓ To accelerate curing of solvent-based pre-bottoms, colours and finishes.

Advantages:

- ✓ Decreases curing time.
- ✓ Creates a more durable finish.

Use with:

- ✓ Top 3 Finish

Available as:

- ✓ 50 ml

Pre-Bottom C

WATER-BASED, CATIONIC PRE-BOTTOM

Pre-Bottom C is a water-based primer designed for use on highly absorbent leathers (such as aniline) and pigmented leathers with light cracking. Pre-Bottom C is an excellent adhesion promoter, it bonds with both the surface of the leather and the colour to create a strong bond between the two. Pre-Bottom C is also an absorption blocker – it slows the leather's ability to absorb colour and ensures an even application of colour. This feature also makes Pre-Bottom C excellent at blocking bleed through from ink and dye stains. It can also be used to repair leather with isolated or light cracking. The product is sticky – it essentially glues the cracks together.

Application: Hand application recommended

Suitable for: Suitable for aniline and pigmented leather

Skill require: Experience required

TIPS: Pre-Bottom C should be hand applied. Colour should be applied (either by spraying or hand wiping) when the Pre-Bottom is still wet, this creates a stronger bond between the colour and the leather. Pre-Bottom C will remain tacky until colour or finish is applied.

Uses:

- ✓ To improve the adhesion of colour.
- ✓ To ensure even absorption of colour on highly absorbent leathers.
- ✓ To repair light cracking.
- ✓ To prevent bleed through from ink and dye stains.

Advantages:

- ✓ Low viscosity liquid results in a more natural finish.
- ✓ Excellent adhesion promoter.
- ✓ Creates finishes with excellent rub fastness.
- ✓ Cationic pre-bottoms show excellent barrier properties, perfect for preventing ink and dye bleed through.
- ✓ Cationic pre-bottoms exhibit superior permeating power compared to anionic and non-ionic products.

Use with:

- ✓ Rapid S or Soft Remover
- ✓ A suitable leather colour
- ✓ A suitable finish

Available as:

- ✓ 250 ml
- ✓ 1 litre

Pre-Bottom A

WATER-BASED, POLYURETHANE PRE-BOTTOM

Pre-Bottom A is a polyurethane based pre-bottom designed to have a close chemical match to the finishes used in tanneries. This makes it an excellent adhesion promoter, even when used directly over untreated or undamaged pigmented leather. Pre-Bottom A provides excellent adhesion without affecting the softness of the leather.

Application: Hand or spray application

Suitable for: Suitable for pigmented leather, bonded leather and bycast

Skill require: Experience required

TIPS: Pre-Bottom A provides better adhesion on leather with an intact topcoat than Pre-Bottom C, but it is also thicker. Pre-Bottom A is recommended for repairs to heavy traffic areas on furniture leather. Pre-Bottom C is recommended when you want to achieve a more natural look and feel, when you are colouring over ink or pigment stains, or when you are repairing leather with a damaged topcoat.

Uses:

- ✓ Improve the adhesion of touch up colour to finished leather.

Advantages:

- ✓ Excellent adhesion even over existing finishes.
- ✓ High chemical compatibility with tanner finishes.
- ✓ Does not affect the softness of the leather.

Use with:

- ✓ Rapid S
- ✓ A suitable leather colour
- ✓ A suitable finish

Available as:

- ✓ 1 litre

Pre-Bottom S

SOLVENT-BASED PRE-BOTTOM

Pre-Bottom S is a solvent-based primer designed to improve the adhesive qualities of non-absorbent leathers. Pre-Bottoms S ensures that pigmented colours permanently bond to the surface of leather, preventing the colour or finish from peeling.

Suitable for: Suitable for pigmented and aniline leather

Application: Spray only

Skill require: Experience required

TIPS: Before applying Pre-Bottom S, you will need to prepare the leather using Strong Remover. As with most solvent-based products, you need to spray this product with spray equipment. Please read the safety data on the label carefully before using this product.

Uses:

- ✓ Improve the adhesion of colours and finishes.

Advantages:

- ✓ An excellent adhesion promoter.
- ✓ Creates a long lasting finish with high rub fastness.

Use with:

- ✓ Strong Remover
- ✓ A suitable leather colour
- ✓ A suitable finish

Available as:

- ✓ 250 ml
- ✓ 1 litre

Scratch Away

FINISH RESTORER FOR ANILINE LEATHER

Scratch Away is designed to erase scratches from aniline leather. It works by shifting colour to replace the colour missing from the damaged area. It is the perfect remedy for light scratches and scuffs such as fingernail marks or delivery scuffs. Scratch Away can be used on all types of aniline including wax and pull-up leathers.

Suitable for: Aniline leather, wax and oil pull-up leathers

Skill require: No experience required

Uses:

- ✓ To remove light scratches and scuffs from aniline and pull-up leathers.

Advantages:

- ✓ Quick and easy to use.
- ✓ Will not damage leather.
- ✓ Safe for use by both professionals and non-professionals.
- ✓ Because it works by shifting existing colour, there is no variation in hue.
- ✓ Does not require colour application.

Available as:

- ✓ 8 g

Touch Up Aniline

WATER-BASED ULTRA FINE PIGMENT COLOUR FOR ANILINE

Touch Up Aniline is a product formulated for renewing colours that have faded through use and/or from UV exposure. Touch Up Aniline forms an extremely thin, transparent, and self-fixing film that revives aniline leathers, increasing the brightness of the colour tones. Colours can be mixed to achieve the proper hue.

Colourant: Ultra fine pigment

Application: Hand or spray

Opacity: Transparent

Suitable for: Aniline and pigmented leather

Skill required: Experience required

Uses:

- ✓ Recolouring scratches, minor repairs and other small areas of colour loss on pigmented leather.
- ✓ Creating a two-tone effect on pigmented leather.

Available as:

- ✓ 2 oz/57gm

Available colours:

- ✓ M850-210112 Black
- ✓ M850-210132 Yellow
- ✓ M850-210142 Red
- ✓ M850-210152 Blue
- ✓ M850-210162 Neutral

Nubuck Colour

SOLVENT-BASED DYE

Nubuck Colour is a solvent-based dye used to refresh the colour of nubuck leather. It can be used to refresh faded leather or to correct shading on uneven panels. Nubuck Colour is the only solvent-based colour in the Multimaster range. Solvent-based colours work well on nubuck because they dry quickly, which helps prevent napping of the leather.

Application: Spray only

Dry time: Dries in minutes / fully cured in 24 hour

Suitable for: Suitable for nubuck

Skill require: Experience required

TIPS: Because furniture does not fade evenly, Nubuck Colour is designed to be applied in layers. The colour gets darker with each application.

This product should be applied by spray only. An even and consistent spray application is vital in creating an acceptable finish.

We recommend applying Fix 181 as a final coat to improve colour fastness.

Uses:

- ✓ To refresh faded leather.
- ✓ To recolour damaged areas.
- ✓ To even out colour on mismatch panels.

Advantages:

- ✓ Good adhesion.
- ✓ Good wet/dry rub fastness.
- ✓ High flexibility.

Use with:

- ✓ Can be used as a stand alone product, but we recommend applying Fix 181 as a final coat to improve colour fastness.

Available colours:

- ✓ Green
- ✓ Black
- ✓ Blue
- ✓ Bordeaux
- ✓ Brown
- ✓ Lemon
- ✓ Orange
- ✓ Red
- ✓ Yellow

Available as:

- ✓ 250 ml

Leather / Vinyl Markers

NIB TIPPED, SOLVENT-BASED COLOUR REPLACEMENT MARKERS

Mohawk's solvent-based Leather/Vinyl Markers are especially handy for recolouring light scratches and worn edges on leather and vinyl. These valve activated markers provide a smooth, even flow of colour, and offer superior adhesion on both leather and vinyl. Leather/Vinyl Markers are available as a 12 pack assortment which contains markers that will match most common leather colours. The markers can also be used one over another to help achieve a colour match.

Colourant: Pigment

Application method: Marker

Opacity: High

Suitable for: Pigmented leather and vinyl

Skill required: No skill required

Uses:

- ✓ Minor colour replacement on soft vinyl and pigmented leather.

Advantages:

- ✓ Fast and easy to use.
- ✓ Excellent adhesion on both leather and vinyl.
- ✓ Valve activated for smooth flow of colour.
- ✓ Nibs are replaceable.

Use with:

- ✓ Leather/Vinyl Markers can be used as a stand alone product, but for added durability we recommend applying a leather finish (Clear Matt or Clear Gloss marker can be used).

Available as:

- ✓ Individual colours
- ✓ M851-20712 12 Pack Assortment
- ✓ M264-2001 Replacement Nib, Vinyl Marker Channel, 12 Pack (indent)

Available colours:

- ✓ M851-20700 Red
- ✓ M851-20701 Bone
- ✓ M851-20704 Dark Brown
- ✓ M851-20705 Red Brown
- ✓ M851-20707 Dark Taupe
- ✓ M851-20710 Black
- ✓ M851-20714 Dark Grey
- ✓ M851-20715 Antique Ivory
- ✓ M851-20716 Rust
- ✓ M851-20730 Sonoma-Brown
- ✓ M851-20733 Sienna-Saddle
- ✓ M851-20735 Chelsea-Chocolate

12 PACK ASSORTMENT CONTAINS ONE OF EACH COLOUR

E-Z Flow™ Leather Marker

SPONGE TIPPED, WATER-BASED COLOUR REPLACEMENT MARKERS

Mohawk's water-based E-Z Flow™ Leather Markers offer breakthrough technology and design with a new valve and applicator system. Just a couple of pushes on the valve, and the marker is ready to use. The sponge applicator flows effortlessly to spread colour evenly every time, no matter how large or small the area is. The colour lays flat, with no ridges between the rows, blending seamlessly with the surrounding area. The screw-on top provides an air-tight seal so the applicator stays wet and ready for your next repair.

Colourant: Pigment

Application method: Marker

Opacity: High

Suitable for: Pigmented leather

Skill required: No skill required

Uses:

- ✓ Recolouring scratches, minor repairs and other small areas of colour loss on pigmented leather.

Available as:

- ✓ M850-20950 24 Pack Assortment

Advantages:

- ✓ Water-based.
- ✓ Fast and easy to use.
- ✓ Valve type tip provides fluid control.
- ✓ High opacity.
- ✓ Excellent light fastness.
- ✓ Sponge applicator spreads colour evenly.

Use with:

- ✓ E-Z Flow™ Leather Marker can be used as a stand alone product, but for added durability we recommend applying a leather topcoat or finish.

24 Pack Assortment Contents:

- ✓ M850-20900 Dover Beige
- ✓ M850-20901 Omni Black
- ✓ M850-20902 Sonoma Grey
- ✓ M850-20903 Ralston Brown
- ✓ M850-20904 Monarch Mahogany
- ✓ M850-20905 Sorrento Chocolate
- ✓ M850-20910 Sonoma Brown
- ✓ M850-20911 Auburn
- ✓ M850-20912 Rutherford Brindle
- ✓ M850-20913 Emerson Bark
- ✓ M850-20914 Kinsey Dark Brown
- ✓ M850-20915 Burgundy
- ✓ M850-20916 Red Brown
- ✓ M850-20917 Dark Brown
- ✓ M850-20918 Black
- ✓ M850-20919 Brown Spice
- ✓ M850-20920 Rust
- ✓ M850-20921 Bone
- ✓ M850-20922 Claret
- ✓ M850-20923 Navy
- ✓ M850-20924 Taupe
- ✓ M850-20925 Carmel
- ✓ M850-20926 Dark Taupe
- ✓ M850-20927 Brown

Leather Repair Basecoat

SOLVENT-BASED LEATHER COLOUR AEROSOLS

Mohawk Leather Repair Basecoats are solvent-based, heavily pigmented, opaque coatings used to hide the damage while starting the colouring process. The Leather Repair Aerosols are used to colour over damages on pigmented leather where there is colour loss or the leather has been repaired. The aerosols are designed to enable you to match most of the leather furniture that is popular today. They are especially effective at repairing two-tone finishes which are otherwise so difficult to match. The Mohawk Leather Repair Aerosol Range includes Basecoats for matching background colours, Toners to add colour over the Basecoats and to apply the stippled effect in two-tones, and Colour Adjusters for fine-tuning the colour of the repair.

Colourant: Pigment

Application method: Aerosol

Opacity: High

Suitable for: Pigmented leather and vinyl

Skill required: Experience required

Uses:

- ✓ To re-colour repairs or areas of colour loss at the beginning the colouring process.
- ✓ Mask repairs and provide a basecoat colour.

Use with:

- ✓ Leather Repair Colour Adjuster
- ✓ Leather Repair Toner
- ✓ A suitable finish

Available as:

- ✓ Individual colours (13oz/355g aerosols)

Advantages:

- ✓ Highly opaque for fast coverage.
- ✓ Provides base colour to build correct colour match.
- ✓ Creates a long wearing finish.
- ✓ Fade resistant.
- ✓ Fast drying.
- ✓ Formulated for flexibility.
- ✓ Part of a complete system including toners, adjusters and topcoats.

Available colours:

- ✓ M109-3001 Coppertone
- ✓ M109-3002 Light Tan
- ✓ M109-3003 Warm Brown
- ✓ M109-3004 Burnt Umber
- ✓ M109-3005 Cool Brown
- ✓ M109-3006 Burgundy
- ✓ M109-3007 Black
- ✓ M109-3008 White
- ✓ M109-3009 Beige
- ✓ M109-3010 Medium Brown
- ✓ M109-3011 Red
- ✓ M109-3012 Antique White
- ✓ M109-3196 Beige B/C
- ✓ M109-3521 Cognac B/C

Leather Repair Colour Adjuster

SOLVENT-BASED LEATHER COLOUR ADJUSTER AEROSOLS

Leather Repair Colour Adjuster aerosols apply transparent, solvent-based colour to pigmented leather and vinyl. They are used to fine-tune the colour of leather repairs on which Leather Repair Basecoat and Leather Repair Toner aerosols have already been applied. They can be used immediately after the Basecoat to bring the hue in closer accord to the colour of the leather. They can also be used after the application of the Toners to make an adjustment. The principles of colour theory should be observed in choosing which Colour Repair Adjuster should be applied.

Colourant: Pigment

Application method: Aerosol

Opacity: Transparent

Suitable for: Pigmented leather and vinyl

Skill required: Experience required

Uses:

- ✓ Use to alter the hue of the basecoat and toner aerosols.
- ✓ To blend the colour during the repair process and/or the colour of the final repair.

Use with:

- ✓ Leather Repair Colour Basecoat
- ✓ Leather Repair Toner
- ✓ A suitable finish

Advantages:

- ✓ Transparent colour – lightly pigmented.
- ✓ Uses colour theory to work effectively.
- ✓ Creates a long wearing finish.
- ✓ Fade resistant.
- ✓ Fast drying.
- ✓ Formulated for flexibility.
- ✓ Part of a complete system including toners, adjusters and topcoats.

Available as:

- ✓ Individual colours (13oz/355g aerosols)

Available colours:

- ✓ M109-4001 Orange Brown
- ✓ M109-4002 Red
- ✓ M109-4003 Yellow
- ✓ M109-4004 Blue
- ✓ M109-4005 Green
- ✓ M109-4006 White
- ✓ M109-4007 Black

Leather Repair Toner

SOLVENT-BASED LEATHER COLOUR TONER AEROSOLS

Leather Repair Toner aerosols are translucent, solvent-based toners that are formulated specifically for use on pigmented leather and vinyl. They are used to bring the colour of the Basecoat aerosols closer to the colour of the leather or vinyl, similar to the way wood toners are used to blend wood colours. Most of the time, the toning process will darken the colour of the Basecoats. Applying Leather Repair Toners in short bursts will create the stipple effect present in two-tone leathers.

Colourant: Pigment

Application method: Aerosol

Opacity: Semi-transparent

Suitable for: Pigmented leather and vinyl

Skill required: Experience required

Uses:

- ✓ To bring the colour of the Basecoat aerosols closer to the colour of the leather or vinyl – generally to darken.
- ✓ To create stippled effect on two-toned leathers.

Use with:

- ✓ Leather Repair Colour Basecoat
- ✓ Leather Repair Colour Adjuster
- ✓ A suitable finish

Advantages:

- ✓ Transparent colour – lightly pigmented.
- ✓ Uses colour theory to work effectively.
- ✓ Creates a long wearing finish.
- ✓ Fade resistant.
- ✓ Fast drying.
- ✓ Formulated for flexibility.
- ✓ Part of a complete system including toners, adjusters and topcoats.

Available as:

- ✓ Individual colours (13oz/355g aerosols)

Available colours:

- ✓ M109-5001 Warm Brown
- ✓ M109-5002 Cool Van Dyke Brown
- ✓ M109-5003 Black

Fix W 100

WATER-BASED POLYURETHANE FINISH

Fix W 100 is a water-based finish that is ideal for sealing leather. It can be used on any kind of leather except nubuck.

Application: Hand or spray

Suitable for: Suitable for pigmented and aniline leather

Cure time: Touch dry in minutes with application of heat, fully cured in 24 hours.

Skill require: Experience required

TIPS: This product can be applied by hand or spray – spray application tends to provide a more consistent sheen. If applied by hand, make sure you apply an even, single coat. Over application may result in greying.

Fix W 100 is available in matt and gloss. Fix W 100 matt and gloss can be mixed in any proportion to create the correct sheen. Fix W 100 can be combined with Hardener TA to give extra resistance to the finish. For best results, mix 2% (by volume) and dry with a hair dryer or infra-red lamp.

Uses:

- ✓ To seal colours and repairs.
- ✓ To replace damaged topcoats.

Advantages:

- ✓ Good flow out and adhesion.
- ✓ High physical-mechanical fastness (can be improved by adding Hardener TA).
- ✓ High compatibility with tannery finishes.
- ✓ Low odour.

Use with:

- ✓ Rapid S
- ✓ Hardener TA
- ✓ Sherlock Colour System

Available as:

- ✓ 250 ml
- ✓ 1 litre

Available sheens:

- ✓ Matt
- ✓ Gloss

Top 3 Finish

SOLVENT-BASED POLYURETHANE FINISH

Top 3 Finish is a solvent-based, polyurethane finish for aniline and pigmented leathers. Top 3 Finish is the hardest and most durable finish in the Multimaster range.

Application: Spray application only

Suitable for: Suitable for pigmented and aniline leather

Cure time: Touch dry in minutes, fully cured in 24 hours

Skill require: Experience required

TIPS: Top 3 Finish requires a catalytic hardener (Hardener SLR) for maximum performance. You can add 2-5% Hardener SLR. Adding too much hardener will make this product unworkable. Never mix Hardener SLR with Top 3 Finish in a plastic container – the plastic will melt. These products should only be mixed in a glass container.

Top 3 gloss and matt may be mixed in any proportion to create the desired level of sheen.

Build up of Top 3 finish will change the feel of the leather – the more coats you apply the stiffer the leather will feel.

This product should be applied by spraying only. Professional ventilation should be used when applying this product. Please read all safety information carefully before use.

Uses:

- ✓ To seal colours and repairs.
- ✓ To replace damaged topcoats.

Advantages:

- ✓ Hardest and most durable finish in the Multimaster range.
- ✓ High resistance to rubbing and wear.

Use with:

- ✓ Rapid S
- ✓ Hardener SLR

Available as:

- ✓ 250 ml
- ✓ 1 litre

Available sheens:

- ✓ Matt
- ✓ Gloss

Fix 181

UNIVERSAL, BRIGHT SOLVENT-BASED FIXATIVE

Fix 181 is a low build fixative designed to fix colour and stabilise finishes. Fix 181 is so fine that it can even be applied to nubuck or suede to improve the rub fastness of the colour. It makes an excellent anti-aging product for sensitive leathers, such as aniline, nubuck and suede.

Application: Aerosol spray

Drying time: 2-3 minutes

Suitable for: Suitable for pigmented leather, aniline leather and nubuck

Skill require: Experience required

Uses:

- ✓ To fix colour.
- ✓ To stabilise finishes.

Advantages:

- ✓ Super fine finish.
- ✓ Suitable for use on nubuck and suede.
- ✓ Excellent anti-aging properties – helps to prevent colour loss and surface deterioration on sensitive leathers.

Available sheens:

- ✓ Matt
- ✓ Gloss

Available as:

- ✓ 300 ml

Leather/Vinyl Finish™

SOLVENT-BASED CLEAR FINISH

Mohawk Leather/Vinyl Finish™ Aerosols are used to apply a clear, flexible and durable coating to protect and blend in spot repairs on vinyl and pigmented leather.

Application method: Aerosol spray

Suitable for: Pigmented leather and vinyl

Skill required: Experience required

Uses:

- ✓ To seal repairs.
- ✓ To adjust the sheen of a repair.

Advantages:

- ✓ Clear coating – no pigment.
- ✓ Use to adjust sheen of repair.
- ✓ Provides added protection from wear.
- ✓ New! More flexible film.

Use with:

- ✓ Leather Repair Colour Basecoat
- ✓ Leather Repair Colour Adjuster
- ✓ Leather Repair Toner

Available as:

- ✓ 384 ml aerosol

Available sheens:

- ✓ M109-0629 Clear Gloss
- ✓ M109-0630 Clear Satin
- ✓ M109-0631 Clear Flat
- ✓ M109-1000 White Vinyl

Mouth Atomiser

TOOL FOR SPRAY APPLICATION

The Atomiser is a very inexpensive and easy to use tool for spray-applying Leather Spray Grain or small amounts of leather colour. It has 2 tubes positioned at 90 degree angle. One tube is the mouthpiece while the other is the dip tube. The user blows through the mouthpiece causing liquid to be pulled through the dip tube and atomized into a sprayed mist. It is fast and convenient to use because it doesn't have to be hooked to a compressor or an aerosol power pack. Some technicians also use the Atomiser to apply pigment and topcoat over repairs.

Product code: M870-9350

Uses:

- ✓ To apply Leather Spray Grain.

Advantages:

- ✓ No compressor or aerosol pack needed.
- ✓ Easy set up and clean up.
- ✓ Inexpensive.

Use with:

- ✓ Leather Spray Grain

Small Heat Iron

TOOL FOR CURING HEAT CURED COMPOUNDS

The Small Heat Iron with round flat head and heat tube, to be used with Leather & Vinyl Repair Heat Cure Compound for graining and curing techniques.

Product code: M870-5710

Advantages:

- ✓ Enables technicians to apply hot air to the repair area by blowing gently through the plastic tube.
- ✓ Takes little space in a repair kit for service calls.
- ✓ Economical.

Uses:

- ✓ To cure heat sensitive repair compounds.

Use with:

- ✓ Leather & Vinyl Repair Heat Cure Compound
- ✓ Quick Filler

Pressure Unit Spray Tool

No hoses, compressors or wires. Sprays any thinned liquid. Portable industrial sprayer without the usual encumbrances. Utilizes the same principle as commercial spray guns. Replaceable power pack contains a liquid propellant that will spray up to 30 ounces of paint or other sprayable material. Precision preset spray head assures a perfect spray pattern. Ideal for maintenance and production jobs throughout the shop. Extra jars and caps available. Not recommended for waterborne paint.

Uniter's Light Coloured Leather Care Kit

Light coloured leather needs extra care and protection. One of the most common problems associated with light coloured leathers is dye transfer. Regular protection products can't adequately protect leather from dye transfer and regular cleaning products can't remove it. Leather Barrier provides superb protection, stopping the vast majority of dye transfer. Any transfer that does occur is easily removed with Colour Transfer Remover.

Suitable for: All types of light coloured vinyl and leather, except nubuck and suede.

Do not use on dark coloured leathers or vinyl! Do not use on nubuck or suede!

Uses:

- ✓ Protection from dye and print transfer.
- ✓ Regular cleaning and maintenance.
- ✓ To remove dye transfer.
- ✓ To remove water-based stains.

Kit Contents

- ✓ 125 ml Colour Transfer Remover
- ✓ 225 ml Leather Cleaner
- ✓ 225 ml Leather Barrier
- ✓ 2 Soft Cloths
- ✓ 1 Sponge
- ✓ Care Instructions

Unifers Pure Stain Away

Stain Away is a multipurpose stain remover that can be used to remove most common stains from leather fabric and wood.

Suitable for: Timber, fabric (all water washable fabrics) & pigmented leather

Do not use on unfinished leathers, nubuck or suede.

Uses:

- ✓ To remove food and beverage stains
- ✓ To remove other common stains, such as blood, urine, mud and grass stains

Advantages:

- ✓ Phosphate free
- ✓ Biodegradable
- ✓ Contain no hazardous air pollutants
- ✓ Ozone friendly

Available as

- ✓ 150ml

Unifers Pure Wood Polish

Unifers Pure Wood Polish nourishes and enhances the natural beauty of wood. It is suitable for use on gloss, matte, lacquered and laminated finishes.

Suitable for: Timber

Uses:

- ✓ To polish timber furniture

Advantages:

- ✓ Phosphate free
- ✓ Biodegradable
- ✓ Contain no hazardous air pollutants
- ✓ Ozone friendly

Available as

- ✓ 150ml

Unifers Pure Leather Conditioner

Leather Conditioner is water-based product that will keep your leather soft and supple and help to prevent soiling and water, oil and alcohol-based stains. No product can provide 100% protection, but Leather Conditioner will prevent the majority of common stains, and make those stains that do occur easier to remove.

Suitable for: Pigmented leather

Do not use on unfinished leathers, nubuck or suede.

Uses:

- ✓ To help protect leather from water, oil and alcohol based stains
- ✓ To help protect leather from soiling

Advantages:

- ✓ Phosphate free
- ✓ Biodegradable
- ✓ Contain no hazardous air pollutants
- ✓ Ozone friendly

Available as

- ✓ 236ml

Dye Transfer Cleaner

Dye Transfer Cleaner removes tough pigment and dye-based stains such as dye and print transfer. Dye Transfer Cleaner uses the latest advancements in cleaning technology to gently draw stains to the surface of the leather, where they can be easily removed. This ensures that Dye Transfer Cleaner is not only highly effective on stains, but it is also gentle on leather. After removing the stain with Dye Transfer Cleaner you will need to remove any residue using Soft Cleaner or Strong Cleaner. Please note, this product should not be used on dark coloured leather.

Suitable for: Pigmented and aniline leather

Uses:

- ✓ To remove dye transfer.
- ✓ To remove print transfer.

Advantages:

- ✓ Quick and easy to apply.
- ✓ Does not damage the leather or finish, if used as directed.
- ✓ Removes dye and print transfer quickly and safely.
- ✓ High viscosity allows for greater working and dwell time.

Available as:

- ✓ 147 ml
- ✓ 1 litre (Colour Transfer Remover)
- ✓ Light Coloured Leather Care Kit
